

3. **Expiration of Approval:** Provided at least one well is drilled and completed during the initial three (3) year period following approval of a multi-well pad location, such approval permanently vests the permitted location for the number of wells as contained within the initial permit approval. However, only those wells that are drilled and completed during the initial three (3) year period following approval of a multi-well pad location shall be vested. If additional wells are to be drilled at the multi-well pad location following expiration of the initial three (3) year period, the permit for those wells shall be renewed pursuant to this provision. The permit renewal process is the process to ensure application of most recent Best Management Practices (associated with road impacts and mitigation of visual and noise aspects of oil and gas development near residential development) OR (associated with application of the permitting standards contained within this Code). The permit renewal process also allows the Operator to inform the County of any most recent Best Management Practices associated with well drilling and completion. To achieve these goals, the permit renewal process shall include all necessary and relevant provisions of this Code as determined by the Director of Community and Economic Development.
